01 // PROFILE

Third-year Software Engineering student who builds **complete products end to end**: interface design, front-end, APIs, databases, security and app store release. I have designed and shipped **four products on my own** and built a secret-leak scanner for security research. I use AI tools daily and review and test every change myself. Looking for an **internship or junior role in Wrocław** in software development, QA or IT support; available part-time during the semester.

02 // PROJECTS

Kasam Cepte bookkeeping app for small businesses

LIVE

- › Replaces paper ledgers for small shops in Turkey: sales on cash, card or credit, receivables, cheque and loan due dates
- › PDF invoices and statements via WhatsApp; inventory alerts; revenue, profit and VAT reports with Excel/PDF export
- › Role-based multi-user accounts, session revocation, rate limiting and automated security tests

stack React 19 · Vite PWA · Tailwind · Node.js · Express · PostgreSQL · Prisma · Capacitor iOS

Atlas voice assistant for macOS

PERSONAL

- › Controls a Mac and iPhone by natural Turkish speech, with a real-time command-center panel
- › Native Swift wake word and on-device speech recognition; common actions run locally in milliseconds
- › iPhone call handling, calendar reminders, SQLite memory, overnight tasks; asks before any irreversible action

stack Swift · Node.js · SQLite · Canvas 2D · macOS automation

CampusFits social network for verified students

APP STORE REVIEW

- › University-email verification, built to support all 209 universities in Turkey
- › Automatic class groups with chat and polls, plans with RSVPs, campus map, opt-in time-limited location sharing

stack iOS app · maps · realtime chat · campusfits.com

Dijital Mankenim AI product photography

LIVE

- › Turns a phone photo of a garment into on-model images and videos within 48 hours for fashion retailers
- › Built the website, SEO landing pages, generative image/video workflow and pricing

stack generative AI · TypeScript · web & SEO · dijitalmankenim.com.tr

darkleak secret-leak scanner

IN DEVELOPMENT

- › CLI, GitHub Action and web panel: finds leaked keys in code, git history, repo URLs and websites
- › Bug bounty mode with enforced program scope, rate limits and evidence log; pre-commit hook; SARIF for CI

stack Node.js · GitHub Actions · zero dependencies · 182 tests · code on request

03 // SKILLS

LANGUAGES

JavaScript, TypeScript, Swift, SQL, HTML, CSS

MOBILE

Capacitor (iOS), native Swift

FRONT-END

React, Vite, Tailwind CSS, PWA

SECURITY

RBAC, sessions, rate limiting, secret scanning

BACK-END & DATA

Node.js, Express, PostgreSQL, Prisma, SQLite, REST

TOOLS

Git, GitHub, Vercel, Claude Code, generative AI

04 // NOW

- **CampusFits** preparing the App Store launch and the first campus rollout
- **Kasam Cepte** bringing the web app to iOS with Capacitor
- **darkleak** adding org-wide GitHub and Docker image sweeps
- **English** working towards B2, and learning Polish
